Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-16, 18, 26, 33, 41, 42 and 44-49 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. With respect to Claims 1 and 44: the phrase “in response to receiving events” is indefinite. The claim has not positively recited that the events have been received. Therefore it is unclear how an action can be performed in response to the events.
4. With respect to Claims 2, 18, 33, 41, 42, and 45: the phrase “recipients are registered by creating a linked list tree” is indefinite. It is unclear how creating a linked list tree can register a recipient.
5. With respect to Claims 10 and 26: the phrase “for providing indexed access” is indefinite. It is unclear to the examiner as to what the access is to.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this

Art Unit: 3629

subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claims 1-6, 8-22, 24-49 rejected under 35 U.S.C. 102(e) as being anticipated by Lawson et al. (6,185,613).

8. With respect to Claims 1, 2, 15, 17, 18, 31, 33, 35, 37, 39, 41-44, 45, and 48: Lawson discloses a method, system and computer program product for distributing events comprising the steps and means for:

- a. Registering one or more recipients (Column 4, lines 41-46);
- b. In response to receiving events, determining if recipients are registered to receive events (Column 4, lines 41-46) by parsing the event link lists (Column 5, lines 7-21);
- c. In response to said determination, forwarding events to recipients registered to receive events, or dropping event if no recipients are registered for the event (Column 11, lines 9-25).
- d. Creating an event linked list by the recipient (Lawson discloses the recipient is allowed to register with a customer event types as well as discloses the events can be local or global, therefore the examiner considers this to be the recipient registering an event linked list, Column 4, line 50 to Column 5, line 7);
- e. Updating event linked list for adding an event entry (Column 10, lines 7-23).

9. With respect to Claims 2, 4, 18, 20, 33, 34, 37, 38, 41, 42, 43, and 45: It should be noted that in these claims the applicant has used the word "optionally" in regards to a process linked list associated with recipient process entry. This is not a required element in the claim, therefore the rejection of these claims will only rely on the required elements which are the event entries.

Art Unit: 3629

10. With respect to Claims 3, 9-14, 16, 19, 25-28, 30, 32, 36, 40, 46, and 49: These claims are drawn to an optional limitation of the process linked list. These limitations are not required in the claims, therefore are anticipated by Lawson.

11. With respect to Claims 4, 20, 34, 38 and 47: Column 11, lines 49-67.

12. With respect to Claims 5, 6, 21 and 22: Lawson discloses the event record comprising a type of event, where the type of event is used to match the events needing notification (Column 16, lines 20-31). The examiner considers the type of event to be a form of an event code.

13. With respect to Claims 7 and 23: Lawson discloses the use of a filter, which recognizes, when an event has repeated and includes an identifier in the entry (See Figure 4). It is the examiner's position that the identifier constitutes an event count, due to the fact that it indicates if the event has happened more than once.

14. With respect to Claims 8 and 24: Lawson discloses the use of an event queue, which can either be given a priority, or it can be a first in last out queue. It is the examiner's position that anytime there is a queue, there is inherently going to be a pointer to the next event, after one has been processed, (Column 10, line 57 to Column 11, line 8).

Conclusion

15. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Zimmers et al. (US 2005/0013417) discloses the use of an alert notification system with regards to geographical location, March (6,034,605) discloses the use of a notification system in regards to personal information sharing in an emergency, Piccioni (6,842,774) discloses the use of system tracking notification, Stevens (6,404,880) discloses the use of a

Art Unit: 3629

notification system for critical information, Tsumpes (6,973,166) discloses the use of a subscriber contact and notification system, and Hunter et al. (US 2003/0069002) discloses the use of a system and method for notification of emergency information.
